

Checklist for New Patients

For your first visit with me, here is a checklist to help remind you to bring the following. These will help me define your specific needs. Thank you.

—Dr. Amy Burkhart

- 1.** Your completed health questionnaire, even if you have already sent it in—just in case we have not received it. It is to your advantage to send it in a week ahead of time if possible. If Dr. Burkhart has had time to review it before the appointment, she will have more time to discuss your specific needs during the appointment.
- 2.** All medications and supplements. Please bring the actual bottles if you have them.
- 3.** Any prior pertinent medical records such as labs, procedures, studies, notes, etc. If possible, bring a copy to leave with her.
- 4.** Names/addresses of your primary care physicians, if you would like any correspondence sent to them.
- 5.** Due to the allergies/sensitivities of many patients please refrain from wearing perfumes or scents to your appointment
- 6.** Parking is available in the lot behind the building. Access to the parking lot is from Brown St. You may park in any available space even if it is marked for another merchant. We all share the entire lot.
